Hector Davila
Frontend Developer

2 years of experience in Frontend Development, specializing in the MERN Stack. My focus is on creating high-quality products with an outstanding user experience, and my passion for learning is unwavering.

EXPERIENCE

JavaScript Frontend Developer
Inktradex

Aug 2022 - Oct 2022

Inktradex is a translation platform for various types of documents in multiple languages. The goal was to enhance the user experience by making UI changes, adding animations, and improving the content.

Responsibilities:
- Create and refactor components in React.js to enhance code quality and scalability.
- Enhance performance of existing styles and add animations for a better UX.

Key Accomplishments:
- Refactored over 20 components, improving the code quality.
- Enhanced the proposed design, making it more appealing, leading to a positive impact on UX.
- Expanded and applied my prior knowledge of Next.js (version 12).

Stack:

TypeScript, ReactJS, NextJS (12), Styled-Components.
